

CODIORA

OUR CODE BUILDS YOUR VISION

Welcome to Your Professional Journey with Codiara!

Hello Everyone,

First of all, congratulations on being selected for the **Codiara Remote Internship Program**. Today marks the beginning of your professional journey, and we are excited to have you onboard.

Day 1: Orientation Day

Today, we will start with an orientation instead of assigning a heavy technical task. In a professional environment, understanding the workflow, expectations, and responsibilities is just as important as technical skills.

Our goal is not to overload you with work from day one. Instead, we want you to gradually adapt to a real-world professional environment.

✅ Orientation Task #1 – Share Your Offer Letter on LinkedIn

If you have received your internship **offer letter**, upload it to your **LinkedIn profile** and mention **Codiara Software House** in your post.

This is important because:

- It helps build your professional online presence.
- Your LinkedIn profile becomes stronger and more credible.
- Industry professionals and recruiters can see your learning journey.
- You start building a professional portfolio from Day 1.

Orientation Task #2 – Submit the Orientation Form

After posting your offer letter on LinkedIn, fill out the Orientation Form that will be shared shortly.

You will be asked to provide:

- Full Name
- Father's Name
- Student ID (mentioned on your offer letter)
- WhatsApp Number
- LinkedIn Post URL

Please make sure all information is submitted correctly.

Why Are We Doing This?

A strong LinkedIn profile is one of the most valuable assets for students and fresh graduates.

Throughout this internship, you will be encouraged to share your progress, projects, and achievements on LinkedIn. By the end of the internship, you will have a professional record of your work that can help with future internships, freelance opportunities, and job applications.

How This Internship Will Work

- You will receive **one task per week**.
- You can complete it at your own pace during the week.
- We encourage you to work on it consistently rather than waiting until the last day.
- Just like in a software house, progress should be made step by step.

As you complete your **weekly tasks**, you will also share your progress on LinkedIn. This will help you develop the habit of documenting your work and showcasing your skills professionally.

 Important

Completion of the Orientation Task is mandatory for all interns. Please complete both steps as soon as possible after receiving this message.

We wish you a successful and productive internship journey ahead.

Best of Luck!

Regards:

Codiora Team
