

# CODIORA

OUR CODE BUILDS YOUR VISION

## WEEK 7 TASKS

### 1. Frontend Development

#### Task Title:

#### Final UI Polish, Testing & User Experience Enhancement

#### Objective

Your portfolio website is now feature-complete. This week, your responsibility is to perform a complete review of your project, fix any remaining issues, improve user experience, and prepare the application for final submission. Focus on delivering a polished, responsive, and professional website that provides an excellent experience for every user.

#### Requirements

##### 1. Complete Website Review

Review every page of your portfolio carefully.

Check for:

- Broken links
- Missing images
- Incorrect buttons

- Typing mistakes
- Layout inconsistencies
- Navigation issues

Every section should work perfectly.

## **2. UI & UX Improvements**

Improve the overall user experience by:

- Making buttons more interactive
- Improving spacing between sections
- Creating consistent typography
- Improving color consistency
- Making the interface cleaner

The website should look modern and professional.

## **3. Responsive Testing**

Test your website on:

- Mobile phones
- Tablets
- Laptops
- Desktop screens

Fix every responsive issue you find.

## **4. Performance Audit**

Use tools such as **Google Lighthouse** to evaluate:

- Performance

- Accessibility
- SEO
- Best Practices

Improve your score wherever possible.

## **5. Accessibility Review**

Ensure that:

- Images contain Alt Text
- Forms have Labels
- Keyboard navigation works correctly
- Colors have sufficient contrast
- Headings are properly structured

## **6. Final Documentation**

Update your README file with:

- Project Overview
- Features
- Technologies Used
- Installation Steps
- Live Demo Link
- GitHub Repository
- Screenshots

## **Recommended Technologies**

- React.js

- Next.js
- Tailwind CSS
- Lighthouse
- Framer Motion

### **Evaluation Criteria**

- UI Quality
  - Performance
  - Accessibility
  - Responsiveness
  - Documentation
-

## 2. Backend Development

### Task Title:

### Backend Quality Assurance & Security Review

### Objective

Your backend APIs are complete. This week, your focus is to improve reliability, strengthen security, eliminate bugs, and ensure your backend behaves correctly under different scenarios.

### Requirements

#### 1. Complete API Testing

Test every endpoint using:

- Postman
- Swagger

Verify:

- Successful Responses
- Invalid Requests
- Unauthorized Access
- Missing Data
- Error Handling

#### 2. Security Review

Review your backend and improve:

- Authentication
- Authorization
- Password Encryption

- Environment Variables
- Input Validation

Ensure your API follows secure coding practices.

### **3. Database Optimization**

Review your database and:

- Remove unnecessary data
- Optimize queries
- Verify relationships
- Check indexes (if applicable)

### **4. Error Handling**

Improve API responses by providing:

- Meaningful Error Messages
- Correct HTTP Status Codes
- Centralized Error Handling

### **5. Logging & Monitoring**

Log important events such as:

- User Login
- Failed Requests
- Server Errors
- Authentication Failures

## 6. Final Documentation

Update project documentation with:

- API Endpoints
- Authentication Flow
- Database Structure
- Environment Variables
- Deployment Guide

## Recommended Technologies

- Node.js
- Express.js
- MongoDB
- PostgreSQL
- Swagger
- Postman

## Evaluation Criteria

- Security
  - Reliability
  - Documentation
  - Performance
  - Testing
-

### 3. Full Stack Development

**Task Title:**

**Final System Testing & Production Readiness**

**Objective**

Your Portfolio Management System should now be fully functional. This week, perform comprehensive testing, resolve bugs, improve usability, and prepare the system for final presentation.

**Requirements**

#### 1. Complete System Testing

Test every feature including:

- Registration
- Login
- Logout
- Dashboard
- Profile Management
- Skills Management
- Project Management
- Search
- Filters
- Image Upload

Fix every issue you discover.

#### 2. End-to-End User Flow Testing

Verify the complete workflow:

- User Registration
- User Login
- Dashboard Access
- Project Creation
- Project Editing
- Project Deletion
- Profile Update
- Logout

Everything should work without errors.

### **3. Improve User Experience**

Enhance:

- Loading Indicators
- Success Messages
- Error Messages
- Navigation
- Dashboard Layout

### **4. Security Review**

Verify:

- Protected Routes
- Authentication
- Authorization
- Input Validation

Prevent unauthorized access.

## **5. Final Project Documentation**

Prepare professional documentation including:

- Project Overview
- Features
- Technology Stack
- Database Design
- API Documentation
- Installation Guide
- Deployment Guide
- Screenshots
- Live Project Link
- GitHub Repository

## **6. Final Bug Fixes**

Review your entire project and resolve:

- Functional Bugs
- UI Bugs
- API Issues
- Performance Problems
- Database Errors

## **Recommended Technologies**

- MERN Stack
- Next.js
- Laravel

- Django
- MongoDB
- PostgreSQL

### **Evaluation Criteria**

- Functionality
  - Testing
  - Security
  - Documentation
  - User Experience
-

## 4. Mobile App Development

**Task Title:**

**Final Mobile Application Testing & Optimization**

**Objective**

This week, ensure your mobile application is stable, responsive, and ready for demonstration. Focus on fixing bugs, improving performance, and delivering a smooth user experience.

**Requirements**

### 1. Complete App Testing

Test every screen including:

- Login
- Home
- Profile
- Projects
- Contact
- Settings

### 2. Performance Optimization

Improve:

- Navigation Speed
- API Response Handling
- State Management
- Image Loading

### **3. Error Handling**

Verify:

- Internet Connection Errors
- Invalid User Input
- API Failures
- Empty States

Display user-friendly messages.

### **4. UI Improvements**

Review:

- Typography
- Spacing
- Icons
- Buttons
- Consistency

### **5. Documentation**

Update:

- README
- Installation Guide
- Screenshots
- Features
- Technology Stack

## 6. Final Build Verification

Generate a release build and verify that the application runs correctly without crashes or major issues.

### Recommended Technologies

- Flutter
- React Native
- Firebase
- Hive
- Riverpod
- GetX

### Evaluation Criteria

- Stability
  - Performance
  - UI Quality
  - Testing
  - Documentation
-

## 5. Graphic Design

### Task Title:

### Portfolio Review & Client Presentation Package

### Objective

You have completed your branding assets and portfolio. This week, review all designs, improve presentation quality, and prepare a client-ready portfolio that demonstrates your skills professionally.

### Requirements

#### 1. Portfolio Review

Review all previous designs including:

- Logo
- Business Card
- Social Media Posts
- Portfolio UI
- Brand Guidelines
- Marketing Materials

Ensure visual consistency across all designs.

#### 2. Design Improvements

Refine:

- Typography
- Color Harmony
- Alignment
- Spacing

- Visual Hierarchy

### **3. Portfolio Presentation**

Prepare a professional presentation including:

- Introduction
- Design Process
- Final Deliverables
- Mockups
- Client Benefits

### **4. Export Professional Files**

Export your work in:

- PDF
- PNG
- JPG

Organize files into clearly named folders.

### **5. Design Case Study**

Document one project by explaining:

- Client Requirement
- Research
- Concept
- Design Process
- Final Result

## **6. Final Quality Check**

Verify that all files are:

- High Resolution
- Properly Named
- Easy to Present
- Free of Design Errors

## **Recommended Tools**

- Figma
- Adobe Photoshop
- Adobe Illustrator
- Canva

## **Evaluation Criteria**

- Creativity
  - Presentation Quality
  - Branding Consistency
  - Organization
  - Professionalism
-

## 6. Data Analysis

**Task Title:**

**Final Dashboard Validation & Business Presentation**

**Objective**

Your dashboard is complete. This week, focus on validating your data, refining your visualizations, and preparing a professional business presentation that clearly communicates your findings and recommendations.

**Requirements**

### 1. Validate Your Dataset

Check for:

- Missing Values
- Duplicate Records
- Incorrect Data Types
- Inconsistent Entries

Ensure your dataset is clean and accurate.

### 2. Dashboard Review

Review:

- Charts
- KPIs
- Filters
- Slicers
- Layout

Ensure everything works correctly.

### **3. Business Insight Validation**

Review every insight and verify that it is supported by the data. Remove any misleading or unsupported conclusions.

### **4. Executive Presentation**

Prepare a presentation covering:

- Project Overview
- Data Source
- Dashboard Features
- Key Insights
- Recommendations
- Future Scope

### **5. Documentation**

Prepare:

- Dashboard User Guide
- Data Dictionary
- Methodology
- Tool List

### **6. Final Quality Assurance**

Review the entire project and ensure:

- Visualizations are accurate
- Charts are readable

- Dashboard is interactive
- Reports are professionally formatted

### **Recommended Technologies**

- Power BI
- Tableau
- Python
- SQL
- Excel
- Pandas

### **Evaluation Criteria**

- Data Accuracy
  - Dashboard Quality
  - Business Insights
  - Presentation Skills
  - Documentation
-

## Week 7 Outcome

By the end of **Week 7**, interns should have **fully tested, polished, and professionally documented projects** that are ready for their final evaluation.

- **Frontend Developers** will deliver a polished, responsive, and high-performance portfolio website.
- **Backend Developers** will provide secure, optimized, and thoroughly tested APIs with complete documentation.
- **Full Stack Developers** will finalize a production-ready Portfolio Management System with end-to-end testing, bug fixes, and comprehensive documentation.
- **Mobile App Developers** will produce a stable, optimized, and user-friendly application ready for demonstration.
- **Graphic Designers** will present a complete client-ready portfolio showcasing their branding, creativity, and design process.
- **Data Analysts** will submit a validated Business Intelligence dashboard with executive reporting and actionable insights.

## **LinkedIn Submission**

### **After completing your task:**

1. Share your work on LinkedIn.
2. Include screenshots of your progress.
3. Briefly explain what you built and what you learned.
4. Submit your LinkedIn post link through the provided **Week 7** Google Form.

### **Submission Guidelines**

- Use any technology of your choice.
- Focus on quality rather than quantity.
- Keep your work organized and professional.
- Creativity and additional features are encouraged but not mandatory.

### **Submission Deadline**

Submit your work before the assigned deadline.

### **Best of Luck!**
