

CODIORA

OUR CODE BUILDS YOUR VISION

WEEK 3 TASKS

1. Frontend Development

Task Title:

Professional Portfolio Website V2 – Interactive Experience

Objective

In Week 1, you created a portfolio website. In Week 2, you enhanced the UI and added advanced sections. In Week 3, your goal is to improve user interaction, accessibility, and performance while creating a more professional user experience.

Requirements

1. Project Filtering System

Create project filters based on:

- Web Development
- Mobile Development
- UI/UX Design
- Data Analysis
- Other Categories

Users should be able to dynamically filter projects without refreshing the page.

2. Project Details Modal

When a project card is clicked:

- Open a modal window
- Display complete project details
- Show technologies used
- Show project screenshots

3. Blog/Articles Section

Create a new section containing:

- At least 3 technical articles
- Article cards
- Read More functionality

4. Performance Optimization

Improve:

- Image optimization
- CSS organization
- JavaScript optimization
- Loading speed

5. Accessibility Improvements

Implement:

- Proper semantic HTML
- ARIA labels

- Keyboard navigation
- Accessible color contrast

6. Contact Form Validation

Add:

- Required fields validation
- Email validation
- Error messages
- Success notifications

Recommended Technologies

- HTML5
- CSS3
- JavaScript
- Tailwind CSS
- Bootstrap
- AOS
- GSAP

Evaluation Criteria

- Interactivity
- Performance
- Accessibility
- User Experience
- Code Quality

2. Backend Development

Task Title:

Advanced Portfolio Management APIs

Objective

In Week 1, you built authentication and project APIs. In Week 2, you expanded portfolio management features. In Week 3, you will implement advanced backend functionality used in professional applications.

Requirements

1. File Upload System

Allow users to upload:

- Profile Images
- Project Images

Store files securely.

2. Role-Based Authentication

Create:

- Admin Role
- User Role

Implement permissions.

3. Project Search & Filtering

Enable filtering by:

- Category
- Technology

- Project Status

4. Pagination

Implement pagination for:

- Projects
- Skills

5. Activity Logging

Store:

- Login History
- Project Updates
- Profile Changes

6. API Security Improvements

Implement:

- Password Hashing
- Rate Limiting
- Input Validation
- Error Handling

Recommended Technologies

- Node.js
- Express.js
- Laravel
- Django
- MongoDB

- PostgreSQL
- JWT
- Multer

Evaluation Criteria

- Security
- API Performance
- Code Structure
- Database Design
- Authentication

3. Full Stack Development

Task Title:

Professional Portfolio CMS Dashboard

Objective

In Week 3, convert your Portfolio Management System into a mini Content Management System (CMS).

Requirements

1. Dashboard Analytics

Display:

- Total Projects
- Total Skills
- Recent Activities
- User Statistics

2. Image Upload Feature

Users should:

- Upload Profile Images
- Upload Project Images

3. Project Categories Management

Allow:

- Create Categories
- Edit Categories
- Delete Categories

4. Portfolio Preview System

Create a live portfolio preview page.

Changes made in the dashboard should immediately reflect in the preview.

5. Search & Filtering

Implement:

- Search Bar
- Category Filters
- Skill Filters

6. Responsive Dashboard

Ensure:

- Mobile Compatibility
- Tablet Compatibility
- Desktop Compatibility

Recommended Technologies

- MERN Stack
- Next.js
- Django
- Laravel
- PostgreSQL
- MongoDB

Evaluation Criteria

- Full Stack Integration
- Dashboard Functionality

- Database Design
- User Experience
- Feature Completeness

4. Mobile App Development

Task Title:

Portfolio App V2 – Interactive Features

Objective

Transform your portfolio application into a professional mobile experience with enhanced functionality.

Requirements

1. Project Categories

Add:

- Category Filtering
- Search Functionality

2. Project Details Screen

Display:

- Description
- Technologies
- Images
- Project Links

3. Profile Editing Screen

Allow users to:

- Update Personal Information
- Update Contact Information

4. Theme Management

Implement:

- Light Mode
- Dark Mode
- Theme Persistence

5. Local Data Storage

Store:

- User Preferences
- Theme Settings

6. App Performance Optimization

Improve:

- Navigation Speed
- Screen Loading
- State Management

Recommended Technologies

- Flutter
- React Native
- Firebase
- Shared Preferences
- Hive
- Riverpod
- GetX

Evaluation Criteria

- App Structure

- User Experience
- Performance
- Feature Implementation
- Code Quality

5. Graphic Design

Task Title:

Personal Brand Marketing Kit

Objective

In Week 3, expand your branding system into a complete marketing package that can be used professionally.

Requirements

1. Portfolio Case Study Design

Create:

- Project Overview
- Problem Statement
- Solution
- Final Outcome

2. Service Flyer Design

Design a promotional flyer for your services.

3. LinkedIn Carousel Design

Create:

- 5–7 Slides
- Professional Layout
- Educational Content

4. Email Signature Design

Include:

- Name

- Position
- Logo
- Contact Information

5. Social Media Campaign

Design:

- 3 Professional Posts
- Consistent Branding

6. Brand Presentation

Prepare:

- Logo Presentation
- Color System
- Typography System
- Mockups

Recommended Tools

- Figma
- Canva
- Photoshop
- Illustrator

Evaluation Criteria

- Branding Consistency
- Creativity
- Professional Quality

- Visual Hierarchy
- Presentation Skills

6. Data Analysis

Task Title:

Advanced Portfolio Insights Dashboard

Objective

In Week 3, create a professional analytics solution that generates meaningful business insights from portfolio data.

Requirements

1. Data Cleaning

Perform:

- Missing Value Handling
- Duplicate Removal
- Data Validation

2. Advanced KPIs

Create:

- Project Completion Rate
- Skill Distribution Score
- Technology Usage Index
- Category Performance Metrics

3. Interactive Dashboard

Add:

- Filters
- Slicers
- Dynamic Charts

4. Trend Analysis

Analyze:

- Technology Trends
- Skill Trends
- Category Growth

5. Executive Summary

Prepare:

- Key Findings
- Recommendations
- Future Improvements

6. Dashboard Presentation

Present insights through:

- Power BI
- Tableau
- Python Dashboards

Recommended Technologies

- Power BI
- Tableau
- Excel
- Python
- Pandas
- NumPy

- SQL

Evaluation Criteria

- Data Quality
- Dashboard Interactivity
- Insights
- Reporting
- Visualization Quality

Week 3 Outcome

By the end of Week 3:

- Frontend Developers will have a highly interactive professional portfolio.
- Backend Developers will have secure and scalable APIs.
- Full Stack Developers will have a mini Portfolio CMS.
- Mobile App Developers will have an advanced portfolio application.
- Graphic Designers will have a complete marketing and branding package.
- Data Analysts will have an interactive business intelligence dashboard.

LinkedIn Submission

After completing your task:

1. Share your work on LinkedIn.
2. Include screenshots of your progress.
3. Briefly explain what you built and what you learned.
4. Submit your LinkedIn post link through the provided week 2 Google Form.

Submission Guidelines

- Use any technology of your choice.
- Focus on quality rather than quantity.
- Keep your work organized and professional.

- Creativity and additional features are encouraged but not mandatory.

Submission Deadline

Submit your work before the assigned deadline.

Best of Luck!
